

Press Release

Datavideo introduce three new high quality TFT LCD monitors.

Datavideo Corporation, specialists in video production products, conversion technology, and high quality TFT LCD monitors, have announced that they have begun shipping of three new high quality TFT LCD monitors, adding to their acclaimed current range of monitors, 4 x 4" monitor bank and 7" DV monitor.

As a leading manufacturer Datavideo work closely with LCD manufacturers to ensure only the highest quality displays are used, and offer a guarantee against spotlight defects. The high quality professional TLM monitor series automatically switches between PAL / NTSC, and for flexibility can be powered via 12 V DC or AC power.

The new monitor line-up start with TLM-350, a 3.5" portable monitor that can be powered direct from mains or from the supplied battery. The TLM-350 offers connection for two Composite Video sources, with a resolution of 480 x 234 Pixels and a view angle of (V)+15/-35°, (H)+50/-50°. Datavideo supplies the TLM-350 complete with a carrying case, battery pack & charger, sun shield and ball & socket head.

The second monitor in the new range is the TLM-700; a 7" wide screen monitor with switchable aspect ratio, 16:9 & 4:3. On the front panel are easy to use adjustments for brightness, contrast, colour & tint (NTSC only). The TLM-700 offers two selectable Composite Video inputs, and a resolution of 1440 x 234 pixels, together with a view angle of (V)+50/-40°, (H)+30/-30°. For convenience in the field, there is a standard tripod mounting bush in the base of the TLM-700, and it is supplied with a padded carrying case.

The final monitor released is the TLM-702, a 19" Rack Mount 2 x 7" wide screen monitor with switchable aspect ratio, 16:9 & 4:3. On the front panel there are easy to use adjustments for brightness, contrast, colour & tint (NTSC only) for both monitors. The TLM-702 offers two selectable Composite Video inputs per monitor, and for added convenience there is also a transparent loop-through of the video signal from both inputs. The ingenious casing design allows the monitors to be tilted up or down even when they are mounted in a rack. Each monitor has a two colour tally light immediately above the screen, this is particularly useful if it is being used with a Datavideo switcher. The resolution is 1440 x 234 pixels, with a view angle of (V)+40/-60°, (H)+60/-60°. The TLM-702 is the ideal companion for Datavideos switcher range including SE-500 & SE-800, but the 19" rack design also makes the TLM-702 the perfect choice as a monitor in video or presentation installations.

The Datavideo TLM monitor series is designed for video professionals that insist on superior performance. After all, every professional knows that you are only as good as the tools you use.

Whether it's in combination with switchers, 19" rack monitoring, in field operation, video editing, or the most advanced multimedia video you're creating, the Datavideo TLM monitor range offers the right tools for your job.
