## **Datavideo Introduce DKV-100 New Low Cost ChromaKey Solution**

Datavideo is pleased to announce the DVK-100, an entry level, stand alone Chromakey solution.

The DVK-100 is the first Chroma Keyer that is designed for schools, small studios, wedding videographers and small size production companies. Now, it is easy to create a virtual studio effect without spending large sums of money. All you need is a DVK-100, a single colour background (Blue or Green is the best.), two video cameras and proper lighting.

Available to support either PAL or NTSC video standards (separate units), this useful device features three composite and S-Video inputs allowing for dual camera and separate background connectivity.

### **Features:**

- 2 x foreground & 1 x background video input
- Selectable key out background colour (Blue, Green or Black)
- Adjustable key out level to reduce shadow
- S(Y/C) and Composite video input and output
- Adjustable matte window
- Brightness, Contrast, Colour and Tint (NTSC) control
- Built in TBC
- RS-232 controllable
- GPI trigger interface for switching between two different camera foreground sources
- PAL or NTSC units available (separate units)

For full details of the specification please check out [www.datavideo.info](http://www.datavideo.info) or contact your local Datavideo office, Distributor or Reseller
