For Immediate Release

**Fast Forward Video Builds Australian Presence Through
G.D.B. International's Extensive Dealer Network**

IRVINE, Calif. — August 10, 2004 — Fast Forward Video, Inc. (FFV), a recognized innovator of digital video recorder (DVR) technology for professional broadcast, industrial video, presentation, and military applications, today announced that Australia's G.D.B. International, a Canberra-based firm specializing in providing multimedia and video solutions to consumer/broadcast markets, has signed on as an FFV distributor for the whole of Australia. Through its extensive professional video dealer network, G.D.B. International will provide sales and support of FFV products, as well as direct consultation in specialized projects.

“We are very pleased to be serving as the Australian distributor for Fast Forward Video,” said G.D.B. International Managing Director Gene Bridge. “Our company has established a reputation in the Australian market for supplying first-rate video-related products at prices that offer excellent value for the money, and FFV equipment fits very well within that business philosophy.”

FFV was one of the first companies to bring digital computer technology to the video industry by applying random-access disk storage to a video device. The company's cost-effective DVR solutions, including the award-winning OMEGA Deck™ DVR, ultra-compact Recon™ DVR board, and DigiDeck Digital Video Recorder™ provide high-performance technology and rugged, reliable operation for sporting events, security and remote monitoring, and other remote and mobile broadcast applications.

More...

“G.D.B. International consists of three separate divisions that include consumer video products, broadcast and professional products, and security and surveillance equipment, and FFV’s digital video recording technologies are very valuable in the latter two of these market sectors,” continued Bridge. “We look forward to introducing the company’s products to new users throughout Australia.”

###

About G.D.B. International

G.D.B. International was established in 1995 and is an Australian direct importer and national distributor. The company is a multimedia and video specialist based in the nation’s capital, Canberra, and it services the consumer and broadcast/professional video market segments, as well as the growing security and surveillance markets. G.D.B. International’s aim is to provide resellers and end users with exceptional value along with superior levels of service and technical support.

About Fast Forward Video

Fast Forward Video, Inc. designs, manufactures, and markets digital video recorders and time-code systems for professional broadcast, presentation, industrial, and military applications worldwide. Founded in 1985, the company was the first to incorporate digital computer technology, including random-access disk storage and data-compression capabilities, into professional video products. Today the company provides video technology solutions into a wide range of applications in broadcast, presentation, security, and graphics and animation markets. Additional information is available at www.ffv.com.
